

In the People table, FirstName, LastName, Address, and Phone are dependant on PersonID.

In Players, Age is dependant on the composite key of PersonID and TeamID.

In coaches, Position is dependant on the composite key of PersonID and TeamID.

In coach, YearsCoaching is dependant on PersonID.

In teams, AgeGroup is dependant on TeamID.

The database is in first normal form, because there is a column that uniquely identifies each row, and there are no repeating groups of columns. The database is in second normal form because it is in first normal form and every non-prime attribute is dependant on the primary key. The database is in third normal form because it is in second normal form and every attribute is fully dependant on the key.
